Housing Affordability Crisis
July 2023

Based on a survey of 2023 household income, the National Association of Home Builders (NAHB) created the chart to the right known as the “Highest Priced Homes They Can Afford”.

At the base of the pyramid, thirty-nine million households cannot afford a home priced above \$150,000, which puts the word “affordability” into perspective, as the median new single-family home was \$425,786 as of March 2023.

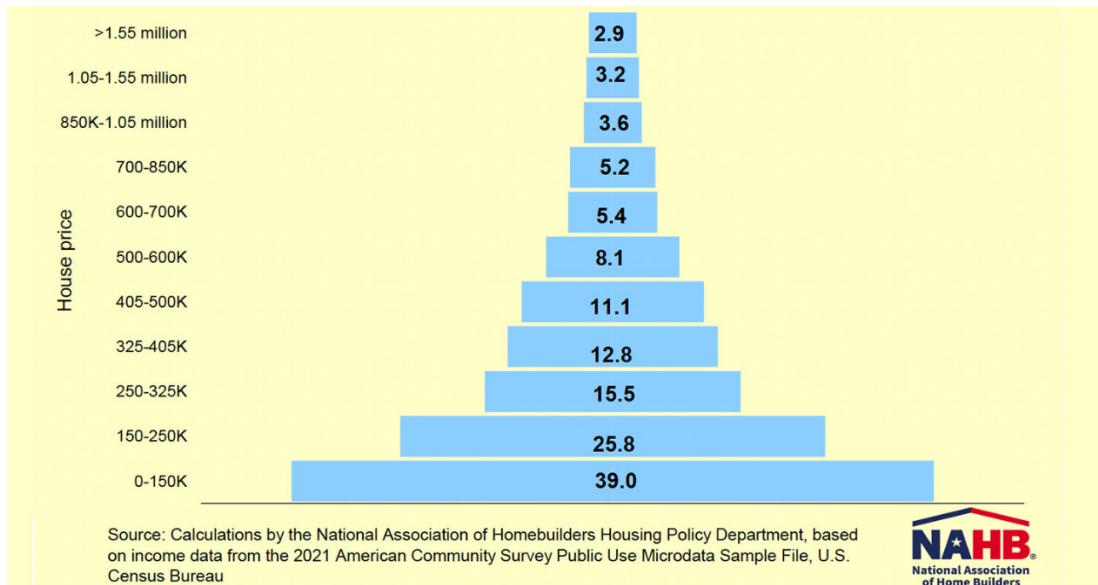

Separately, the national average of a 30-year mortgage currently stands at 7.4%, up from 5.7% twelve months ago. The year-over-year change translates to a 30% growth in interest payments, which further diminishes the word “affordability”.

Along with higher real estate prices and mortgage rates, renters are also facing similar problems. Over the past two decades, more than 70% of the apartments built are considered “Class A”, offering luxury amenities in great locations. Higher inflation has translated into growing rental rates, forcing individuals and families to seek and relocate to cheaper areas, often leading to longer commutes and higher transportation costs.

Further headwinds to renters include the risk of losing nearly 200,000 affordable housing units over the next five years, as U.S. government protections end for many rental properties, freeing landlords to begin raising rents.

The housing affordability crisis, caused by household incomes not keeping pace with rising home prices and rents is a serious national problem. Coupled with record household debt (+\$17 trillion), this issue will be a source of continuing pain for individuals and families. Many current homeowners hold mortgages at lower rates than currently available. They are less willing to sell today, thereby contributing further to the housing shortage. While there is no simple solution to alleviate the lack of supply, lower borrowing rates in the future will likely ease the burden and free up new housing inventory – thereby improving affordability.

Performance Reporting:

1. Changes in portfolio valuations due to capital gains or losses, dividends, interest, income and management fees are included in the calculation of returns. All calculations are made in accordance with generally accepted industry standards.
2. Transaction costs, such as commissions, are included in the purchase cost or deducted from the proceeds or sale of a security. Differences in transaction costs may affect comparisons.
3. Individual client returns may vary due to a variety of factors, including differences in investment objectives, asset allocating and timing of investment decisions.
4. Performance reports are generated from information supplied by the client, custodian, and/or investment managers. BCA relies upon the accuracy of this data when preparing reports.
5. The market indexes do not include transaction costs, and an investment in a product similar to the index would have lower performance dependent upon costs, fees, dividend reinvestments, and timing. Benchmarks and indexes are for comparison purposes only, and there is no assurance or guarantee that such performance will be achieved.
6. Performance information prepared by third party sources may differ from that shown by BCA. These differences may be due to different methods of analysis, different time periods being evaluated, different pricing sources for securities, treatment of accrued income, treatment of cash, and different accounting procedures.
7. Certain valuations, such as alternative assets, ETF, and mutual funds, are prepared based on information from third party sources, the accuracy of such information cannot be guaranteed by BCA. Such data may include estimates and maybe subject to revision.
8. BCA relies on third party vendors to supply tax cost and market values. In the event that cost values are not available, market values may be used as a substitute.
9. BCA has not reviewed the risks of individual security holdings.
10. BCA investment reports are not indicative of future results.
11. Performance rankings are time sensitive and subject to change.
12. Mutual Fund (MF), Collective Investment Trusts (CIT) and Exchange Traded Funds (ETF) are ranked in net of fee universes.
13. Separately Managed Account (SMA) and Commingled Fund (CF) returns are ranked in gross of fees universes.
14. Composite returns are ranked in universes that encompass both gross and net of fee returns.
15. Total Fund returns are ranked in a gross of fee universe.
16. Private investments may include performance fees in addition to a management fee. For the purpose of BCA's calculations, net returns take in consideration both performance and management fees, but gross returns include management fees only.
